

Skills Matrix

Skill	Start of Module	End of Module
Basic Programming	2	2/3
UML models	0	2
OO Programming	1	2
Design Patterns	1	2
Testing	1	2

0 – No competence

1 – Low competence

2 – Reasonable competence

3 – High competence

4- Expert

Action Plan

My plan to continue my development is to continue building projects. Throughout the course so far, I have found that, for me, the most effective way to learn is by putting my skills in to practice and creating software. I plan to revisit the Self driving car project, with feedback from the tutor in mind to see where and how I could improve. Further, I plan to revisit my project from the last module, to see how an object orientated approach could improve it.

Finally, I intend to continue on to the next Module, Secure Software Development to further increase my skillset.
