

Lecturer feedback on Research proposal Presentation

Grade achieved: 66% (Merit)

This was an overall satisfactory presentation. Below you will find a breakdown of the grade:

Knowledge and Understanding

You demonstrated a good understanding of the chosen topic. All the key sections of the presentation are present but not all are equally developed. There was evidence of critical analysis in all the key sections of the presentation.

Presentation and Communication Skills

The research questions were set along with the aims and objectives but could use more focus.

Criticality

The methodology is the main area of improvement. It is promising but needs far more detail to be convincing.

To engage the audience, the presentation needs some improvement (pace and narrative, mainly). Also, the quality of the audio is low and some slides are difficult to hear.

The references are fine.

In any case, I think you're now ready for the actual project, whatever you decide to select.
