# Bar charts

Ex 9.1

**Graph 1. Brand popularity in Area 2**

As you can see from the above graph, brand A is the least popular, followed by brand B, with most participants preferring another brand.
Ex 9.2

Graph 2. Prevalence of heather at Location A and B

The graph clearly shows that the species of interest is more abundant at Location A than location B. At location A, the species was only absent at approx. 15% of plots, whereas is was absent in almost 45% of plots at Location B.

Ex 9.3

Graph 3. Weight loss for diet B

As you can see from the graph 3, there is an outlier at the -5 range. Aside from this outlier, the graph shows there is a positive skewness. This would indicate that most people saw some level of positive weight loss on diet B.
